This rare 1968 Ford Mustang California Special is in great shape and runs as good as it looks. This special edition Mustang was design and engineered by Shelby Automotive for 1968 only and with only 4118 built. The package has really cool features like fiberglass trunk lid, side scoops, and quarter extensions, 1965 Thunderbird tail lights, blacked out front grille, fogs lights, body stripe, and other features. This car is in excellent condition inside and out and has very nice drive manners. It comes with factory AC that blows cold and power steering. It is powered by a 289 V8 mated to a C4 Automatic transmission.
